TELETECHNICS AUTOMATION SOFTWARE

LAN NETWORKS – structured cabling

Security and failure-free operation of the ICT environment are the key categories to proper functioning of the IT infrastructure in a company.

We provide services in the field of designing, developing, and maintaining LAN networks, industrial networks – wireless (WiFi), RTV and sounding

FIRE ALARM SYSTEMS

We design, develop and maintain.

Due to our knowledge and experience, we select the appropriate type of system, basing on the client's needs and specificity of the object. It is the individual approach that facilitates the optimization of the investment costs while maintaining the full functionality.

BUILDING AUTOMATION

Building Management Systems

Building management in the area of integration of other systems, monitoring and control, as well as optimizing the operation of installations and technical devices in buildings

LED SYSTEMS

We adjust to the customer's expectations by selecting only the best and proven solutions and products

We are always with the customer – starting with the energy audit, through the design of lighting systems and lighting replacement, always providing a full service. We can help you calculate the cost of energy consumption, as well as calculate the return and profitability of your investment.

VIDEO SURVEILLANCE

A holistic and open solution and the best image quality.

We design and deliver video surveillance solutions of the highest quality.

INDUSTRIAL AUTOMATION

We handle a comprehensive installation of the industrial automation system.

- project design, installation, certification, set-up and maintenance. We also specialize in repairs of the equipment, constructing prototypes and conduct research and development work in the field of automation.

ELECTRICAL INSTALLATION

Design, implementation and maintenance of electrical installations concerning:

low voltage connections, emergency and basic lighting installations, backup power supply systems, low and medium voltage switchgears, power generators, UPS.

PHOTOVOLTAICS

We provide comprehensive service in the field of photovoltaic:

consultation, design of the project and its execution, as well as service. We have the tools and technology to enable quick and solid implementation.

SAP BUSINESS ONE

One powerful and flexible solution that supports every aspect of your business.

With your company's ever-changing environment, you too need to change. But can your system grow with you? SAP Business One can. It's an innovative solution with the ability to integrate all the business functions in the whole company, and we prepare it together - just for you.

DEDICATED SOFTWARE

Visacom main focus is to develop software that would suit a specific client or a specific purpose.

Our team, who understands the client, plays an invaluable role in the implementation of plans and objectives.
